DETAILED ACTION

This action is in response to the After-Final Amendment received on 12 January 2004 in which claims 1-81 and 83-93 are pending.

Reasons For Allowance

The following is an examiner's statement of reasons for allowance: The instant application is deemed to be directed to a nonobvious improvement over the invention patented in Patent Number 6,137,889 (Shennib et al). The improvement comprises a filament assembly constructed and adapted to fit within the ear canal of an individual for contacting the tympanic membrane directly and imparting audible vibrations thereto, the filament assembly being operational relative to a stationary vibration force element positioned in the ear canal at a distance from the tympanic membrane, the filament assembly comprising: (a) a vibratory element adapted to be laterally positioned to be laterally positioned; (b) a vibrational shaft element extending medially from the vibratory element to the tympanic membrane when the filament assembly is fitted within the ear canal, the filament assembly being dynamically coupled to the stationary vibration force element so as to be statically floating and freely movable within an operable range with respect to the vibration force element, thereby allowing individual adjustment and positioning of the filament assembly for contacting the tympanic membrane and imparting audible vibrations without exerting forces thereto, as substantially described and connected with the other functional language of recited claims 1-81 and 83-93.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2643

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
